

## DWF Aerosol

Penetrating and De-Watering Fluid

### Description

Castrol DWF Aerosol is high quality penetrating and de-watering fluid designed for use by the motorist and in the home or workshop.

Available in aerosol packs this fluid displaces moisture, cleans, protects and lubricates metals.

### Application

The superior creep characteristics of Castrol DWF Aerosol ensures effective penetration of corroded parts to allow for easier extraction, ideal for use on automotive exhaust systems, wheel nuts and suspension units.

When the fluid is used on damp engines it leaves a water-repellent film on the distributor, plugs, coil, ignition, H.T. leads and battery terminals. The extension tube may be used to introduce the lubricant into locks, cables, hinges, linkages and other items which are sometimes difficult to reach. These can be lubricated with ease.

In the home and office Castrol DWF Aerosol is a convenient lubricant for castors, typewriters, clocks, fans and door hinges. The pack is supplied with an extension tube for pin-point lubrication.

### Advantages

- Displaces water from metal surfaces
- Frees corroded parts
- Stops squeaks
- Cleans and protects metals

## Typical Characteristics

Name	Method	Units	Castrol DWF Aerosol
Density @ 20C	ASTM D1298	g/ml	0.8200
Flash Point, COC	ASTM D92	°C	83
Viscosity, Kinematic 40°C cSt	ASTM D445	cSt	4.8

## Storage

All packages should be stored under cover. Where outside storage is unavoidable drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should not be stored above 60°C, exposed to hot sun or freezing conditions.
